Break the pattern.

Unique design

Everything inspires us: nature, plants, animals, landscapes,
engineering, mathematics, art, chaos
- but never other furniture.

We are charting our own course,
breaking new ground, and defying the beaten path.
We are breaking the patterns.

Highest quality

We only use highest quality materials and components.
Prototypes are subjected to tests and verification
until we are fully satisfied with the results.
Every piece has to pass quality control.

Innovative solutions

When design needs it we develop own original technical, engineering and construction solutions in order to achieve desired visual effect, that can't be found in any other furniture .

Sculpting geometry
is our **passion.**

Products

RAVEN CHAIR

Raven is a conference chair with an extremely distinctive design and an unprecedented proprietary construction. Its unique appearance will be appreciated by the most demanding customers, for whom the aesthetics of everything around them is of great importance.

The form of the armchair is the result of a creative collision of three aspects: design, material used and construction solutions. The use of steel as a basic material made it possible to use one of its natural characteristics - elasticity - for cushioning. It was reinforced and stabilized with a top-quality gas spring, which was able to remain subtle and visually delicate by co-working with steel.

H: 102 cm | W: 65 cm | L: 65 cm | Weight: 26 kg

Innovative, proprietary chair suspension design that utilizes the natural elasticity of steel, allowing for the application of a subtle, angled gas spring, which contributes to the overall unique form of the chair.

Metal - exhibiting natural elasticity and suitable for multiple recycling cycles and adheres to the 6R principle (sustainable development principles) - in this case, recycle.

Proprietary swivel mechanism durable with high operational smoothness.

Unique design made possible by innovative construction, the use of steel, and a thoughtful bending technique.

Replaceable upholstery, which wears out the fastest, allows for refreshing the chair, changing the decor, and adheres to the 6R principle (sustainable development principles) - in this case, re-use.

RAVEN CONFERENCE TABLE

The Raven Oak dining table follows the styling of other products in the Raven line.

It owes its unusual appearance to its unique design and subtle detailing. In this project, we did not use ready-made profiles, but created a spatial frame from scratch. This made it possible to use beveled edges that hide to the eye of the observer thereby giving the table a visual lightness. One gets the impression that such an ethereal construction is not physically achievable, and the length of the table impossible.

The geometric slender legs extend beyond the edges of the tabletop like the outstretched wings of a raven in flight and do not directly contact the structure, enhancing the impression of uniqueness that accompanies anyone viewing the table in person.

RAVEN DINING TABLE

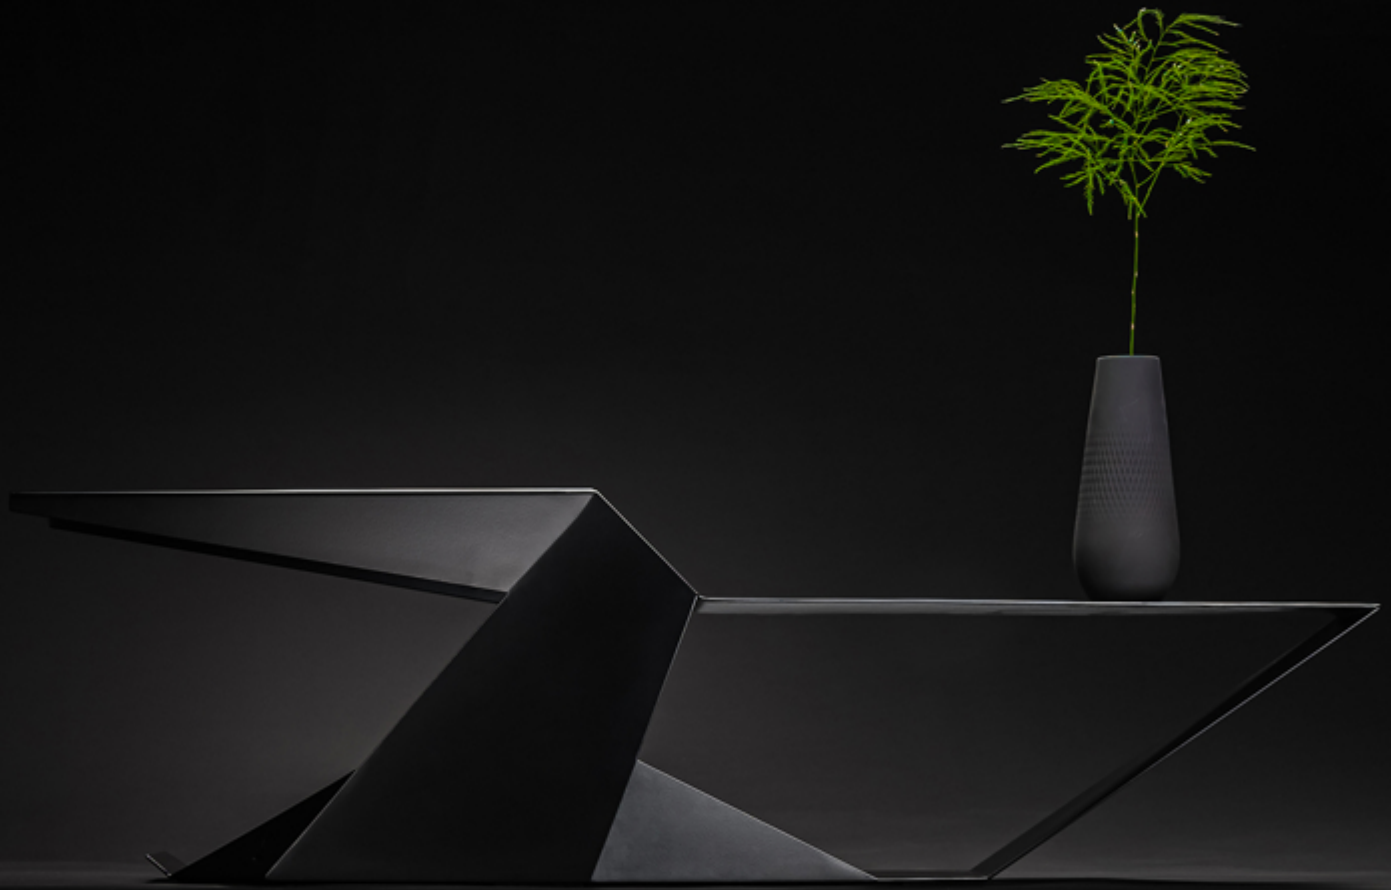

Powder-coated black steel (RAL 9005 matte color) with anti-corrosive primer,
Table top:
- oak woodboard, oiled or
- antiscratch surface, water resistant, UV resistant, High Pressure HPL Laminate Trespa, NA19 Italian Slate

H: 75 cm | W: 134 cm | L: 312 cm | Weight: 50 kg

YACHT COFFEE TABLE

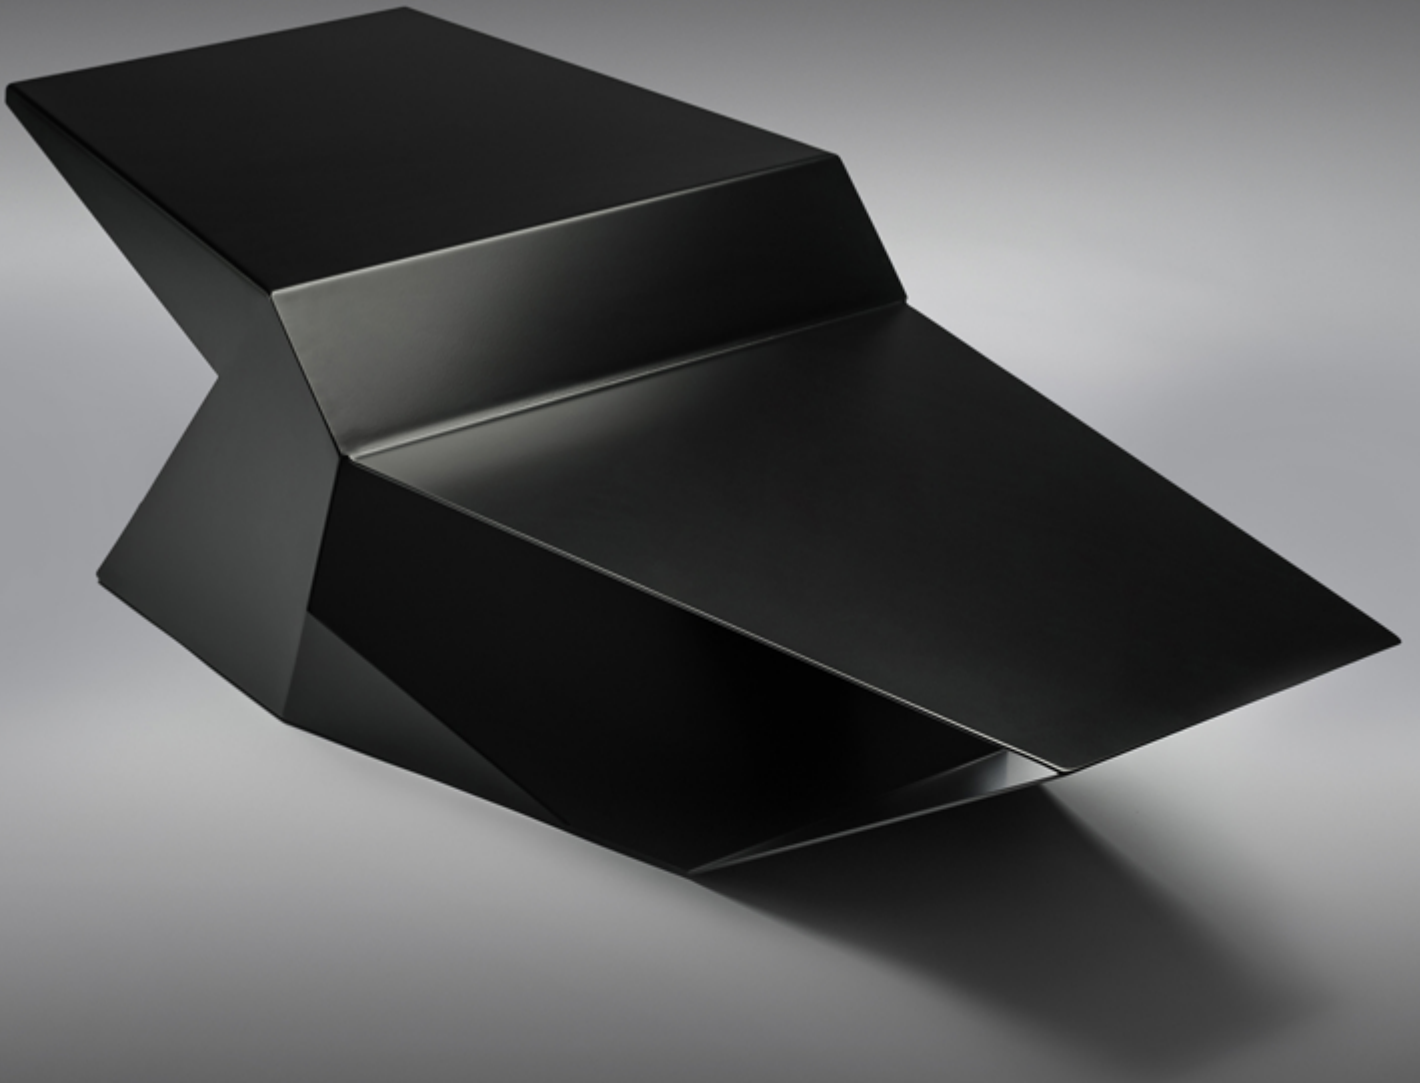

Yacht is a coffee table with a dynamic form, inspired by the elegant shape of a motor yacht's hull. Its design conveys a sense of speed and energy, as if it were ready to break through ocean waves.

Powder-coated black steel (RAL 9007 matte color) with anti-corrosive primer,

H: 40 cm | W: 61 cm | L: 142 cm | Weight: 40 kg

YACHT DECK COFFEE TABLE

The Yacht Deck is an alternative version of Yacht coffee table whose form was inspired by the shape of a motor yacht hull.

The wooden tabletops evoke the decks of these most exclusive vessels. Such a unique inspiration had to be reflected in the highest quality craftsmanship and attention to the smallest detail.

Powder-coated black steel (RAL 9005 matte color) with anti-corrosive primer, Oak woodboard, oiled.

H: 40 cm | W: 61 cm | L: 142 cm | Weight: 40 kg

LOTUS FIRE PIT

The Lotus fire pit, inspired by the lotus flower, is intended not only to perform its primary function, which is to provide a clean and safe place for the fire, but to decorate the garden or terrace with its intriguing form – even when not in use. “Petals” of the flower illuminated by the fire of burning wood is a true spectacle of light and shadow. Due to its form, the fire pit can also successfully serve as a flowerbed for unique plants that need to be exposed.

The fire pit is extremely easy to assemble, as it requires no bolting – all the components are inserted into each other.

H: 83 cm | W: 84 cm | L: 84 cm | Weight: 43 kg

A photograph of a family of three sitting on a wooden deck around a modern, geometric fire pit. The fire pit is made of dark metal plates forming a star-like shape, with a fire burning inside. A woman with long blonde hair, wearing a black dress and high heels, is sitting on the left, looking towards the fire. A man with grey hair, wearing a patterned shirt, is sitting on the right, holding a young child with blonde hair. The background shows a blurred landscape with trees and mountains under a twilight sky. The word "atmosphere" is written in white text in the center of the image.
